

FOR IMMEDIATE RELEASE

Orca Releases New OrcaHub Web Application

San Francisco, CA - January 19, 2018 - The newest San Francisco start-up, [Orca, Inc.](#) announces the latest release of a GitHub™ application today, [OrcaHub™](#), to give the clearest snapshot to a developer's Github repository. For those who want a heatmap of their coding history over the last year, there is absolutely no better solution. The application allows users to instantly see their Github history in glorious color, better than the next nearest competitor. Anoop Macharla, CEO, stated, "In the 21st century, we have designed a simple, yet effective user interface, to consolidate a software engineer's GitHub™ activity."

[OrcaHub™](#) is a web application that can be accessed via any web browser at <https://orcas.holberton.us>.

A three-city conference is planned in the second-half of this 2018. All of the key developers will be on-hand to demonstrate the features in San Francisco, New York City, and Paris, France. Please join us at our free event where we will be serving custom, French pastries. Please check our schedule on our [Facebook™](#) or [Twitter™](#).

[Github Universe™](#) has invited our company to present our product at their next meeting, October 12, 2018. Alexa Orrico, Orcas' Product Manager added, "It is an honor to unveil our product to the world, especially at Github Universe. We will be rolling out our second release very shortly."

[Orca, Inc](#) is a multinational company formed in 2018 that has developed custom solutions for Google™, Apple™, LinkedIn™, Intel™, and other organizations. Please contact us at orcateamhub@gmail.com.
